Technical Skills

Automation Tools: Selenium WebDriver, OOPs concepts
Manual Testing: STLC, SDLC, Defect Lifecycle
API Testing(REST): POSTMAN API testing
Performance Testing: JMeter for performance analysis
Programming Languages: Java, SQL
Problem Solving: Real-time troubleshooting and debugging skills
Communication: Excellent verbal and written communication skills
Tools: GIT, Jenkins, Maven

Soft Skills

- Decision making
- Communication
- Multi-tasking

Education Background

- PG Diploma in Advanced Computing
  CDAC Juhu, Mumbai - Jan 2021
- B.E. Instrumentation and Control
  Pune University - May 2018

Certifications

- Selenium Test Engineer issued by Nasscom
- MasterClass Software Testing with Jira & Agile –Be a QA LeadMasterClass Software Testing with Jira & Agile –Be a QA Lead by Udemy
- POSTMAN API TESTING - Step by Step for Beginners by Udemy

Professional Summary

Dedicated QA Automation Engineer with 3 years of hands-on experience in automation and manual testing. Proficient in leveraging Selenium WebDriver, OOPs concepts, and various testing techniques to ensure software quality. Possesses a strong grasp of API Testing, JMeter for Performance Testing, SQL, Java, and GIT. A collaborative team player with strong analytical and troubleshooting skills, demonstrating exceptional communication in technical environments.

Work Experience

Cybage Software | QA Automation Engineer
April 2021 – Present

Key responsibilities:
- Led the creation and execution of comprehensive test plans, integrating automation using Selenium WebDriver.
- Conducted rigorous manual testing, identifying critical issues early in the development cycle, and ensuring optimal software functionality.
- Collaborated closely with cross-functional teams to resolve complex technical issues in real time, ensuring a smooth workflow and timely delivery.
- Applied strong knowledge of Java and basic SQL to optimize testing procedures and contribute to the development of robust testing frameworks.
- Employed GIT for version control, ensuring seamless collaboration among team members.

Projects

Itrade OMS Integration | QA Automation Engineer
Aug 2021 – Present
Key responsibilities:
- Test Case Creation: Writing detailed test cases to cover various scenarios and functionalities of the software under test.
- Execution and Bug Reporting: Performing manual tests based on test cases, recording test results, and documenting any discovered defects or anomalies.
- Regression Testing: Conducting regression tests to ensure that new features or code changes don't adversely impact existing functionalities.
- Conducted API testing using Postman, verifying functionality, reliability, and performance of RESTful APIs.
- Designed, developed, and executed performance test plans and test cases using JMeter, simulating user scenarios and load conditions to identify system bottlenecks.
- ·Automated test scripts for Sanity test and Regression testing using Selenium along with Java and TestNG
- ·Working in an agile environment and delivering the User Story by the deadline.
- Participated in Regular Sync-up calls and standup meetings with the client and Onsite coordinator.
