ANIL YADAV

SOFTWARE DEVELOPER

About me

A skilled and motivated Senior C# Web Developer with 6+ years of experience developing innovative web applications using ASP.NET, MVC,API, and SQL Server .Excels at working within a fast-paced environment to produce high-quality web applications and websites for an enviable client list. Strong self-motivation and ability to thrive under pressure while working remotely.

Experience

Crystal Data Software Services Pvt Ltd

Senior Developer Sep 2020 – Present

I offered technical guidance and expertise to junior developers, assisting them in understanding complex concepts, coding standards, and best practices. I encouraged them to ask questions and seek clarification to deepen their understanding of software development principles

Software Development Studio

Software Developer dec 2018 – oct 2020

Developed and implemented new features for web applications using ASP.NET Core and Entity Framework, contributing to improved user experience and functionality.

MASYS SOLUTION

Software Developer dec 2017 – dec 2018

Participated in team-based projects, collaborating with peers to solve problems, learn new technologies, and contribute to the development of web applications, demonstrating adaptability and a willingness to learn.

Projects

Certification

Projects Details And Description:

1. My Lab (Company Product)

Technology Used:

Programming Languages: C#, Typescripts
Frameworks: ASP.NET MVC, Angular
Database: Microsoft SQL Server
Tools: Visual Studio, Visual Code, Git

Key Responsibilities:

- Led the development team in designing and implementing both frontend and backend modules of the My lab management system.
- Provided technical guidance and support to junior developers and collaborated with cross-functional teams during system deployment and user training sessions.

- Here the multiple logins/users on the application like doctor, Lab technician and admin.
- The Lab can register the patient as well as generate the report and Bill of the patient. report like Blood test, suger testetc

2. Travel Management System (PIDILITE)

Technology Used:

Programming Languages: C#
Frameworks: ASP.NET
Database: Microsoft SQL Server
Tools: Visual Studio

Key Responsibilities:

- Led the development team in designing and implementing both frontend and backend modules of the My lab management system.
- Provided technical guidance and support to junior developers and collaborated with cross-functional teams during system deployment and user training sessions.
- Develop and maintain backend components of web applications using ASP.NET MVC, C#, and SQL Server, ensuring adherence to coding standards, best practices, and project requirements.

Description:

- The software design for the Travel and Claim for the TSI of Pidilite industries.
- Here the multiple logins/users on the application like TSI and there approval and Also the cashier who can check and on the base of details approve and reject the Claim

3. **Distributor On-Boarding**

(Client - Bajaj)

Technology Used:
- Programming Languages: C#, Typescript.
- Frameworks: ASP.NET, Angular.
- Database: Microsoft SQL Server.
- Tools: Visual Studio, Visual Code.

Key Responsibilities:
- Led the development team in designing and implementing both frontend and backend modules.
- Provided technical guidance and support to junior developers and collaborated with cross-functional teams during system deployment and user training sessions.
- Implemented role-based access control to ensure data security and compliance with company policies.

Description:
- The software designs for the On-Board the new distributor and De-Board the existing.
- Here the multiple logins/users on the application like Sales Officers, ASM, SM, ZH, CM, SD and MDM Team.
- The Sales officer fill all the required details for on-boarding after summation the document goes to the next level as per the mapping of the master. At the end MDM will download the details into the Excel and create new distributor on their SAP.

4. **Tally Interface**

Technology Used:
- Programming Languages: C#.
- Frameworks: ASP.NET.
- Tools: Visual Studio

Key Responsibilities:
- Led the development team in designing and implementing both frontend and backend modules.

Description:
- To find the data from SAP and Post all the master and Transaction data into the Tally as per the Customer Requirements.
