CAREER OBJECTIVE

I want to be associated with a dynamic and progressive organization that will allow me to utilize my abilities and qualifications in the field to add value to the organization while providing me with growth opportunities for growth.

PROFESSIONAL SUMMARY

- Extensive knowledge in **Data analysis, Designing Interactive Dashboards/Reports, and Data Modelling of Star**
 - Enhancing the load time for Power BI reports by 40% through **performance tuning** the data model and the DAX queries using DAX STUDIO.
 - Performing complex **SQL, and T-SQL** queries in extracting data
 - Used Python Libraries like Pandas, NumPy, Seaborn, Matplotlib, Sci-Kit Learn
 - Worked on various types of transformations that are available in power query.
 - Worked with **Power BI services**. Worked on creating dashboards, and dataset refresh through gateways.
 - Analyse the current ETL process, and define and design new systems.
-

PROFESSIONAL EXPERIENCE

Fujitsu, Pune | Apprentice | Dec 2024 – Present

Description:

- Apprentice at Fujitsu Pune, specializing in Application & Multi-Cloud Services with completion of Saba Training Course.
- Currently learning Japanese to enhance cross-cultural communication and collaboration with global teams in the cloud services domain.

Responsibilities:

- Currently learning Japanese to enhance communication with global teams and improve project collaboration across regions.
- Engaged with Saba Cloud Learning as part of the apprenticeship program, participating in structured training courses
- Utilized Saba Cloud Learning to track progress, assess knowledge gaps, and refine technical skills within cloud-based environments.

PROJECTS SUMMARY

Project 1 | Insurance Claims Analysis.

Domain: Sales Analysis.

Description: This report is designed to analyse and visualize overall information related to sales for sales leaders and management to improve strategic planning. A variety of KPIs are tracked on the four majors: sales values, Product categories, Sales executives, and new customers, as a major focus is growing these accounts.

Responsibilities:

- Creating and Maintaining multiple Power BI reports.
- Writing complex DAX measures to create different metrics.
- Implementing dynamic RLS.
- Resolution of bugs and defects identified, Root cause analysis, and providing optimized solution.

- Participating in every phase of SDLC from Requirement & Impact analysis, Build, and Unit Testing to verification post-deployment.

Project 2 | Material Report Management

Domain: Manufacturing

Description:

- In this project we were supposed to analyse the plant production, wastage, and recovery.
- Create and manage a Global dashboard for senior leadership to get insights of the overall performance of various plants worldwide.

Responsibilities:

- Creating bar charts for month-wise production as well as wastage analysis.
- Using matrix tables to create machine-wise production, and day-wise production. Calculation of wastage % with actual waste per total Production.
- Scheduling daily refresh over power bi service where the data is loading from SQL.
- Creating and Maintaining Power BI reports based on assessment data and other manufacturing data generated globally across the plants.
- Resolution of bugs and defects identified, Root cause analysis and providing optimized solution.
- Implementation of Row Level Security by defining various constraints for each defined role
- Redefine and make technical/strategic changes to enhance existing Business Intelligence systems.

TECHNICAL SKILLS

- ✓ Microsoft Power BI
- ✓ MS SQL Server
- ✓ SQL, T-SQL
- ✓ Python
- ✓ Pandas, NumPy, Matplotlib

EDUCATION

University: DBATU Lonere, MH

Degree: Bachelor of Technology in Electrical Engineering

Aug 2023

DECLARATION

I hereby declare that the information given above is true to the best of my knowledge.
