QA Professional with 3 years of experience

HIGHLIGHTS

- **Primary Skills:**
  - QA Stack: Manual Testing, Selenium, Java, Postman, Web Application Testing
  - Frameworks: Page Object Model, Hybrid Framework.
- **Additional Skills:**
  - Software Engineering Practices: TestNG, Maven, JIRA, Jenkins
  - Repositories: GitHub, Git
  - Deployment: GCP, Microsoft-Azure.
- **Domains:**
  - Capital Market, Healthcare.

SUMMARY

- Experience in automating web application using **Selenium WebDriver, TestNG, and Maven with Java**
- Experience in developing and working on automated tests using Page Object Model with **Hybrid Frameworks** using **Java**
- Experience in testing Windows, Web-based applications
- Experience on working with tools such as **JIRA, Git-hub.**
- Experience working on **Agile Methodology.**
- Expertise in Functional, Re-Testing, Regression, Smoke, Integration, and Sanity Testing
- Experience on reporting and tracking defects using JIRA
- Experienced in identifying object locators and creating Page Factory.
- Executing Test scripts using different Browsers (Edge, Chrome, and Firefox).
- Expertise in client interaction and customer relationship management
- Experience in **Hybrid Framework.**
- Knowledge on Jenkins CI/CD.
- Involved in participation of regular weekly project status meetings to discuss the risks and involved in ongoing projects with Teammates.
- A keen analyst and team player with thorough understanding of all aspects of the SDLC from understanding client requirements through direct client interaction, translating them into technical specifications, and driving their execution

EDUCATIONAL QUALIFICATION

- Bachelor of Engineering from Shivaji University Kolhapur with 68 %.

EMPLOYMENT DETAILS

- Worked as **Software Test Engineer** in Maverick, Pune from February 2021 to June 2023 & Working in DSS WORLD PVT LTD from July 2023 to till date.

PROJECT EXPERIENCE

Project 1: HSBC Equity Trade Book System
Client: HSBC, USA.
Role: QA Engineer

Responsibilities:
- Understanding the requirement documents like BRD, FRD etc.
- Reviewing the Business Requirement Specification documents
- Involved in the Test analysis process in identifying the test cases.
- Designing manual test cases as per test scenarios using FRD Document.
- Creating Test cases using Element locators and Selenium WebDriver methods.
- Executed test cases and updated the test cases status.
- Prepared test cases and test data.
- Responsible for verification, validation of closure of bugs – Defect Tracking
- Actively participated in smoke, functional, Integration Testing.
- Involved in Regression testing.
- Review the entire flow of application to have knowledge on the functional flows.
- Involved in executing the test cases against the functional specifications.

Environment: Selenium, Java, Maven, TestNG, Git, JIRA, Manual Testing.

Project 2: Subscriber Portal, Health Insurance
Client: Molina Healthcare
Role: QA Engineer
Responsibilities:
- Understanding and estimating user functional requirements
- Engaged in designing, executing test cases and reporting defects
- Creating Test cases using Element locators and Selenium WebDriver methods.
- Enhancing Test cases using Java programming.
- Grouping Test cases and generating detailed Test reports
- Analyzing Test Results and Reporting Defects.
- Involved in smoke, sanity testing, integration, functional testing, bug verification, and regression testing
- Responsible for defect management which includes rising new defects, defect analysis and follow up to the closure of the defect
- Responsible for communicating defects to client

- Involved in daily team discussions, team meetings and Scrum Calls

Environment: Selenium, Java, Maven, TestNG, Git, JIRA, Manual Testing, GitHub
