PROFESSIONAL SUMMARY

Seeking a challenging and innovative position in a firm that will maximize the opportunities for me to implement my skill set and knowledge as well as use my capabilities in the best way possible so that I can enrich my skills and aid the development of the firm I work with.

SKILLS

Techniccal skills:

~Programming languages: Python,Java,SQL.
~Framework/Library: Linux,Pandas,Data collection,Numpy.

~Database: MySQL
~Operating System: Windows, Linux

PROFESSIONAL EXPERIENCE

Zinnia
E-commerce market place application.
Back-end(software development) | July, 2022 -September,2022

~Created web applications using Python, and SQL database.
~Analyzed requirements to optimize features and functionality.
~Coordinated project status and issue communication with team members.
~Conducted thorough testing and identified bugs before deployment

RELEVANT PROJECTS

(Client Project)
Data Analyst | August, 2023 - December, 2023

~It is basically telecom Company,we used to handle the customize data, clients are from south Africa,we used to gather for requirements get tha data from there then we used to get data into Excel sheet from different sources, collect the data in single source.

~Microsoft Excel for data filtering According to the requirements,And SQL for finding relevant data for some queries.

~Led the successful implementation of a real-time dashboard visualization project, utilizing Tableau, to track key performance indicators and monitor data accuracy, resulting in a 15%increase in operational efficiency and data-driven decision making.

~ Improved data accuracy and reduced data processing time by 40% by optimizing and automating data cleansing, extraction and analysis processes.

Technology used :
Python Programming, Vlook-ups, Microsoft Excel, Microsoft office,SQl, Tableau.

Stock Market Prediction

Stock Market Prediction Using Deep Learning(CNN) | 04 August, 2021 - Feburary, 2022
~ Stock market prediction and analysis are some ot the most difficult jobs to complete.

~There are numerous causes for this, including market volatility and a variety of other dependent and independent variables that influence the value of a certain stock in the market.

~These variables make it extremely difficult for any stock market expert to anticipate the rise and fall of the market with great precision.

~Project is based on LSTM MODEL(long short term memory).

~Using Python Program Language, to predict company's stock predictions. -Stock Calculating after 20days prediction.

EDUCATION

2018 - 2022 | Savitribai Phule Pune University

Bachelor of Computer Engineering

2017 - 2018 | Swami Samarth College.

HSC
2015 - 2016 | Priyadarshini English High School.

SSC

CORE COMPETENCIES
~**Programming languages**
~**Back-end Developer**
~**SQL Developer.**

ACHIEVEMENTS

~**Technothon | Byte And Bits**

  Winner(01/2019)
~**Hackerrank | SQL(Advanced)**

~**Hackerrank | Coding(Python)**
  Winner(08/2020).

CERTIFICATION

C,C++,JAVA- DISHA INSTITUTE
Python- DISHA INSTITUTE
SQL,Data Analyst- UDEMY

INTERESTS

~To play cricket
~Actively participate in social work activities.
