Experienced **Php Developer** with 1.5+ years of expertise in developing and maintaining web applications using **Php**, **CodeIgniter**. Proven track record in optimizing application performance, reducing bugs, and improving overall code quality, resulting in increased user engagement and revenue growth.

PROFESSIONAL EXPERIENCE

☐ CodeMake Technology Pvt Ltd.

Software Developer, November 2022 – Present

- Rendered solid technical expertise in software development life cycle and **Php** technology to develop application based on specific client requirements.
- Develop application backend using **CodeIgniter** framework.
- Develop highly interactive and customized UI's using **JavaScript**, **Html** and **CSS** to improve functionality of web applications.

PROGRAMMING SKILLS

- **Programming Languages:** PHP, Java, SQL, Html, CSS, JavaScript.
- **Frameworks:** CodeIgniter, Laravel, Hibernate, Bootstrap.
- **Database:** MySQL, Tomcat Server.
- **Tools:** Git/GitHub, Postman API, Jira, VS Code, Eclipse.

PROJECTS

☐ Web Application

- This project is a **Web Application** developed using **Php** as the backend.
- Main objective of this project is to build platform where company can streamline the entire workflow, from content creation by writers and graphic designers to management by social media managers.
- This project provides flexibility to the users and also reduce the efforts of clients for the marketing.
- Creating and managing **customer details**, **client list**, **templates**, **rules** configurations, and sort data based on condition.
- The technologies I use includes **Php**, **CodeIgniter**, **Html**, **CSS**, **JavaScript**, and **Bootstrap**.

⬜ Key features and Technologies used

- o **Data File Generation**: The web portal allows users to generate data files based on specific data and conditions.
- o **Customer and Client Management**: The application is capable of creating and managing customer details, client lists, templates, and rules configurations. It can also sort data based on various conditions.
- o **Application Support**: The project provides application support for projects.
- o **Technologies Used**: The technologies used in this project include **Php**, **CodeIgniter**, **HTML**, **CSS**, **JavaScript**, and **Bootstrap**. Php and CodeIgniter are used for backend development, HTML, CSS, and Bootstrap for frontend development, and JavaScript for dynamic web page functionality.

RESPONSIBILITIES

- Development based on given requirement.
- Developing methods/functions for CRUD operations.
- Responsible for enhancing the functionality of current software.
- Provide solutions to the problem identified by the client.
- Participate in requirement discussion.
- Support the Testing team as and when required

EDUCATION

⬜ **PVG's College of Engineering and Technology**
BE in printing and graphics technology: CGPA 7.66   *JUN 2018 – JULY 2022*

⬜ **Balasaheb Bharde High School**
12th HSC: percentage 65.08%   *FEB 2018*

⬜ **Balasaheb Bharde High School**
10th SSC: percentage 75.40%   *MARCH 2016*
