EXPERIENCE

Lentra AI Private Limited
Business Analyst

Pune, Maharashtra
(July 2022 - Present)

- Gathering Business requirements from different stakeholders of the product and providing easy solutions for business needs in our SaaS based LOS Product.
- Developed comprehensive business requirements documents (BRDs) and Use cases to facilitate the development and implementation of new software solutions. By building High Level Solution (HLS), Understanding Documents (UDs) and Technical Specifications Documents (TSDs).
- Active interaction with cross functional teams to define and prioritize software features and its functionality, ensuring alignment with business objectives.
- Conducted GAP analysis to identify the areas where existing technology solutions did not meet business needs.
- Actively led and managed the UAT/CUG testing to ensure software solutions met business expectations, resulting in the successful launch of multiple new CR's with 0 defects and 100 percentage quality and matured implementation.
- Led Training and Product demo presentations for end users on new software systems, resulting in improved user adoption and increased efficiency.
- Worked closely with stakeholders to develop and maintain project timelines, ensuring timely delivery of product solutions.
- Handled multiple projects simultaneously, balancing competing priorities and ensuring successful project completion within established timelines and budgets.
- Providing assistance to IT staff in regards to Change Management policies and Service & Support Delivery team for tackling the movements and RCA's. Managed more than 75+ Production releases.
- Applied and evaluated the project progress with Agile and SDLC methodologies.
