SUMMARY

Experienced mobile app developer with 3+ years of expertise in mobile app development using Flutter and react native. Skilled in implementing realm database, test driven mobile app development. Have sound knowledge on Agile methodologies and scrum tools like Jira. Have good working knowledge of source control tools like GIT and SourceTree. Passionate about leveraging AI and also used git copilot in projects.

EXPERIENCE

Software Engineer

Tech Mahindra (Born XDS)

Product 1: Mahindra Finance (MMFSL - Udaan)

- **Framework:** Flutter.
- Worked on bugs and stories with outdated code developed by other company.
- As backend was not developed for the stories, worked with mock responses using Mockoon.
- Worked on realm database integration to copy one persona address details in other personas address fields.
- Wrote unit test cases for repositories and cubits.
- Worked closely with BEDs and BAs in order to provide smooth data integration and app functionality with tight deadlines.
- Used version control (Bitbucket) to raise PRs and also worked on review comments added by leads and architects and resolved merge conflicts of PR.

Product 2: XDS Store front

- **Framework:** Flutter.
- Worked on key screens like homepage, search page, PLP page, PDP page using clean architecture and bloc pattern.
- Created homepage widgets and carousels using carousels_slider library.
- In search page worked on API integration and search functionality.
- In homepage created hamburger menu to navigate to PLP.
- In PLP, worked on CRUD with realm database.
- Wrote test cases for Bloc, widgets and repository.

Product 3: ABFRL (Super app)

- **Framework:** React Native.
- E-Commerce app for 4 combined brands of ABFRL (Allen Solly, Peter England, Van Husen and Louis Phillippe).
- Managed states using react redux toolkit for APIs.
- Code optimization of CLP page, BLP page, sale landing page.
- Developed YouTube pop-up for Peter England homepage.
- Worked on bugs in all stages of app pages.

CERTIFICATIONS:

- The Complete Flutter Development Bootcamp with Dart [26-July-2023] - Udemy.com
- React Native -The Practical Guide [2022] - [19 October 2022]- Udemy.com

SKILLS

Programming Languages: Dart and Javascript.

Frameworks & Technologies: Flutter and React Native

Tools & Technologies: VS Code, Android Studio, Xcode and SourceTree.

Version Control: Git and Bitbucket

Testing Frameworks: Mockito, bloc test and Goolden toolkit

EDUCATION

Bachelor of Engineering (Civil)

JJMCOE Jaysingpur

C-DAC (IT) Infoway, Pune

KEY ACHIEVEMENTS

Got appreciation from architect
