PERSONAL PROJECTS

SOCIETY QUERY MANAGEMENT

- Technologies: HTML, CSS, Node.js, Express.js, Angular, FireBase.
- Our system is implemented to help manage the affairs of a society by requiring the committee member to enter and save minimal amount of information. Our system tries to comfort its users with easily understandable as well as essential functionalities.

HOTEL MANAGEMENT SYSTEM

- Technologies used : HTML , CSS , Bootstrap , PHP , MySQL.
- In this project A customer can book a room and also choose facilities which he is looking for, can modify check-in/check-out dates, can take a look for rooms which are available, can check booking updates , can check rooms availability.

Car Sales

- Technologies used : Java, Swing(GUI)
- Using this application we can add car details if we want to sell it, if we're going to buy then we can easily filter out using car age or car price and brand.
