SUMMARY

Experienced Backend Developer with a proven track record in API design and development. Skilled in C#, ASP.NET Web API, and SQL, with notable contributions to Vigilant Insight in creating APIs, optimizing queries, and ensuring high code coverage. Known for delivering scalable, efficient code and enhancing team performance.

WORK EXPERIENCE

Cognizant Technology Solutions

Nov 2022 - Present

- Programmer Analyst - .Net Back-End Developer
-

PROJECT

Viigilant Inside

Mar 2023 - June 2024

- Vigilant insight is a software intended to provide infusion data analytics in the form of dashboard and reports.
 - The software is intended to improve the accuracy of clinical settings included into a dataset intended healthcare professionals are able to review these reports and make adjustment that ensure operational efficiency within their healthcare facility
 - Created an API for an event processor that processes JSON snapshots from external applications, ensuring smooth data ingestion and integration with internal systems.
 - Developed unit tests to ensure high code coverage, validating functionality and improving the reliability of the application.
 - Optimized SQL queries and managed efficient data transport to enhance system performance and data retrieval.
 - Implemented and integrated clean, efficient, and scalable code to enhance application performance and maintainability.
-
