I am a Full Stack Senior Developer with lots of experience making entire websites and apps. I'm good at both the front and back parts of development, making sure databases work well with what users see. I always do my work to a high standard and am good at staying calm and doing well in any situation. I understand what a project needs and can make easy-to-use solutions that are better than expected.

Web Technologies	Core.Net, Asp.Net, MVC, Angular
Databases	MS-SQL, Oracle **11g**, MySQL, MongoDB
Reporting Tools	Crystal Reports, SQL Server Reporting Services
Scripting Languages	JavaScript, HTML, CSS, jQuery, TypeScript
Development Tools	Visual Studio & Visual Code

Crystaldata software services (India) Pvt. Ltd. Projects: -

Prism Bandhan (Integrate with SAP)

Languages: - Asp.Net Api(c#) & Angular (Typescript).

At Prism Cement Bandhan, we've efficiently integrated SAP for data retrieval, utilizing both direct APIs and scheduled APIs for seamless integration. Additionally, we've created an executable file (exe) for tasks like balance checking and invoice access. Furthermore, Sales Order and Delivery Order functionalities have been seamlessly incorporated, alongside modules for Ledger and Credit Limit management.

Racold CRM (Product installation, service and remuneration).

Languages: - Asp.Net Mvc c#.

Racold Software offers services and installations related to Heater products. The software includes features such as a "Click to Call" option for franchisees, integration with WhatsApp API for communication, and a Digital Signature API for documentation. Additionally, it incorporates an executable file for calculating monthly remuneration for service and installation tasks.

Bajaj Dms (Uploading Invoice, Bill & Manage Data).

Languages: -ASP.NET Net c#.

Document Management System is designed for
1. Invoice submission against Non-Purchase Order
2. Invoice submission against Purchase Order
3. Central Processing Team (CPT PO and CPT NPO) of Bajaj Consumer Care.
with respective attachments and details like document number, document date, type, purchase order
number purchase order date, basic amount, tax amount, total amount, remark.
Document Management System is taking care of Approval matrix for CPT NPO Process which receives
document submitted by Business Partner through this system.

Retailer Application (Complaints Register and Product Register).

Languages: - Asp.Net Mvc c#.

The Retailer app is tailored for creating installation and service tickets, enabling retailers to monitor pending requests and collect customer feedback through the Net Promoter Score system. Developed on ASP.NET MVC with MS SQL for database management, the app also features a "Track Service Report" function. Retailers can track service or repair applications using either the customer's mobile number or the service request number.

Support: - Provided technical guidance and support to junior developers and collaborated with cross-functional teams during system deployment and user training sessions.

Dsv info solutions Projects: -

Dry-Fruits & More (Core php).

15-May-2020 to 25-Jun-2020.
I created both the front and back-end design for the shopping website "Dry Fruits & More," including the admin panel.

Trust Website (Core php)

01-Aug-2020 to 20-Aug-2020.
I developed everything for the Shree Ram Bhakt-Parivar website, including front-end and back-end design, as well as the admin panel for managing administrators.

R-Fresh Fruits& Vegetable(php).

10-Sep-2020 to 16- Dec- 2020.
Refresh Green is a leading food destination in India, offering its services through physical retail stores and an online portal application. Our presence spans across 36 neighborhood convenience stores in Mumbai, Pune, and Bangalore. We offer a diverse range of products, including fresh fruits and vegetables, through our stores and online platform

Brown Store shopping (Php and MySQL)

20- Dec -2020 to 09- Mar-2021.
The Brown Store is an online shopping website where customers can bid on wine. They can participate in   games related to wine and have the opportunity to bid and win. This website is built using PHP and uses a MySQL database.

Shoes shop (Laravel)

10-Mar-2021 to 30-Aug-2021.
I developed a shopping website called "Shoes Shop," where I handled all aspects of frontend and backend design, including creating the admin panel. I utilized Laravel version 7.3 for development. The website features functionalities such as adding items to the cart and Wishlist, placing product orders, integrating payment gateways, and implementing an executable file for retrying failed transactions.

Sport Betting Site

15-Sep-2021 to 28-Oct-2021.
This is a sports betting website where sports enthusiasts can place bets on events from a variety of sports and have the chance to win prizes. The website is developed using PHP and utilizes a MySQL database.
