Sameer Joglekar

Data Analyst Fresher

Address Badlapur, India 421503

Phone 09404155450

E-mail joglekarsamir@gmail.com

An enthusiastic freshness with leadership skills and highly motivated having Bachelors of Engineering Degree in Computers by Gharda Institute of Technology, University of Mumbai. Certified Data Science program of the Imarticus Institute one of the best institutes in India. Proficiency in analytic tools such as Python, R Programming, SAS and Tableau used for data science and analysis. Interested in learning new technologies and methods.

Skills

Python

Tableau

Word

Excel

Sql

Professional Experience

Jan 2023 - Mar 2023

Intern

Corizo, remote

- Completed data cleaning and data validation of existing spreadsheets to promote robust data management platform, resulting in accurate data analysis and entry.

Education

Jun 2010 - Apr 2011

SSC

Dyandeep Vidyamandir School - Dapoli, MH

Jun 2012 - Apr 2013

HSC

RamRaje College - Dapoli, MH

Jul 2014 - Jul 2018

B.E: computer

Gharda Institute of Technology - Mumbai, Khed, Maharashtra, MH

| **Nov 2018 -** | **No Degree: Data Sciences** |
| **Mar 2019** | *Imarticus Learning Institutes - Thane* |

Certifications

Tableau desktop professional - TAB1467IND

Accomplishments

- Training Certificate
- project
- Credit Risk Analysis (During Certification 2019) (4 Members)
- The project was performed in python during the course of data science.
- In this project we worked on bank loan dataset in which we predicted the defaulters using logistic regression model and classification was done using decision tree model so that to get knowledge on which factors should the loan should be granted or reject.
- Wine Quality Analysis(During Training)(5 Members)
- Tech Stack - Numpy ,Pandas , Matplotlib ,Sklearn , Regression Analysis , Machine Learning Algorithm , Sanborn.
- The project was conducted using the python language for data science training. In this project, we worked on a quality data set with wine quality based on a regression and classification model. The most accurate model score is 0.92%.
