**Summary** — I am a Senior Software Developer with a strong background in technology and software engineering. I excel in utilizing frameworks such as .NET and Angular to develop complex applications. With a proven track record of completing substantial projects and a passion for learning, I thrive in challenging environments that allow me to leverage my technical skills and contribute to exceptional software solutions.

## Skills

**Automation** Ansible, Chef

**Cloud** Azure, AWS

**Languages** C#.Net, TypeScript, Dart

**OS** Windows, Linux

**Frameworks** .NET, .NET CORE, Angular 17, React JS, Flutter, ABP Framework

**Markup Languages** Javascript, HTML, CSS, jQuery, AJAX

**Database** Oracle Database, SQL Server

**Reporting Tools** SQL Server Reporting Service (SSRS)

**Version Control Tool** TFS, GITLAB, SVN

**Familiar** REST API, Bootstrap, Responsive Web Design, Linq, Asp.Net MVC, Onion and Clean Architecture, Repository Pattern, Knockout js, Vue JS

## Education

**D.G Ruparel College**

Bachelor of Science in Information Technology  
Cum. GPA: 8.07 / 10.0

Mar 2021 — Matunga, Mumbai

**S.K Somaiya College**

HSC Board  
Percentage: 71.54%

Mar 2018 — Vidyavihar, Mumbai

**Vanita Vikas Vidyalaya**

SSC Board  
Percentage: 90.20%

Mar 2016 — Ghatkopar, Mumbai

## CourseWork

### Udemy Courses

- Web Development Masterclass
- Advance Flutter Programming
- Cloud Computing
- DevOps Computer Class

## Internship

**Adiroha's Cybersecurity and Ethical Hacking**

Sep 2019 - Aug 2020

- Operating Systems and Information Retrieval
- OWASP Top 10 Vulnerabilities
- Functional Programming (Unix Tools and Scripting)

## Experience

**National Center of Information Technology (NCIT)**

Apr 2023 – Present

Senior Software Developer

- NCIT is a leading consulting firm in the space of IT solutions. They also develop customized applications suiting the needs, requirements and expectations of clients. NCIT solutions and applications cater to Manufacturing, Healthcare, Mutual funds, Banking and Finance and Logistics.
- Completed 5 Lakhs+ billing project, implementing UI requirements using ASP.NET, JS/jQuery, HTML, CSS, Angular 17, and MS SQL 2019 as the backend.
- Implement business logic in .NET, business intelligence solutions, and business rules to integrate disparate data sources toward a centralized data store.
- Developed and maintained custom data-centric web applications using ASP.NET, .NET, and Services with Agile methodology
- In Angular Create and maintain a reusable component library to promote consistency across projects.

**Active Neuron Technology**

Oct 2020 – Mar 2023

Software Developer

- Active Neurons Technology is an Information Technology company that strives to create and enhance the digital presence of companies. We deal in Software Development, Web Design and Development, E-Commerce Application, Content Management Solution, Mobile App Design and Development, Support and Maintenance, Hosting Solution, Search Engine Optimization, Social Media Marketing.
- Worked in an Agile team of .NET developers for a fast-paced software development firm.
- Implementing UI requirements using ASP.NET, JS/jQuery, HTML, CSS, Angular 14, and MS SQL 2019 as the backend
- Working on ABP Framework with total 4 Projects Hands-On.  
(ABP is Open Source web Application Framework for .NET CORE with Repository Pattern)
- Working on 10+ Sql DB Design Projects.
- Working as Client-Side with SODEXO as .NET Developer.  
(SODEXO is Product Based MNC, It is the global leader in services that improve Quality of Life, an essential factor in individual and organizational performance. Operating in 56 countries.)

## Projects

---

### **Sampoorna Fasal Suraksha Samadhan — Angular 17 & .NET Core WEB API & Sql Server      ERP s/w — Jun'23 - Dec'23**

- Digitize customer account creation & visibility of operations of spraying solution using .Net Core Rest API.
- Onion Architecture and Repository Pattern.
- Authentication, Authorization and Two-Factor Authentication
- Users will be able to scan QR Code Scanner on the bottles
- User Can give their feedback as well as Sprayer Operator will be able to completion request and Farmer got the notification for the same.
- It is based on .NET Core (.NET Core WEB API) with MS SQL Server as Backend and Angular 17 as Frontend.
- Multi-language support
- Implement entity state management, effects, and selectors for more complex state handling.
- Build reusable directives for encapsulating common behavior
- Dynamic Routing, Push Notification (PWA)

### **DigiClaim — .NET & Sql Server      Claim Management s/w — Oct'23 - Present**

- Digiclaim is Claim raised s/w which raised claim based on Transport Damage Product and Scheme Period time Achieve by creating CN/DN by using Invoice.
- Authentication, Authorization and Two-Factor Authentication
- It is based on .NET (Clean Architecture and Repository Pattern) with MS SQL Server as Backend.
- Implement entity state management, Custom Filters, Optization Queries and Stored Procedures, Session Management.

### **Maauli — .NET Core MVC & Sql Server      ERP s/w — Dec'20 - Mar'21**

- It is ERP (Enterprise resource planning ) Application which managed record for multiple Orders and Maintained master data, Managed User wise roles.
- Authentication, Authorization.
- It is based on .NET Core (ABP Framework ) with MS SQL Server as Backend.
- Implement entity state management, Custom Filters, Creating Stored Procedures, Session Management.

### **Risk and Compliance Management — .NET Core MVC & Sql Server      NPCI s/w — Mar'21 - Jul'21**

- It is NPCI (National Payments Corporation of India) Application more like it is bank cards data testing management, Circular wise compliance tracking of all particular for all banks/ merchants/ Aggregators. Excel Upload and Download integration with background jobs to create and maintain data and send mails periodically.
- Authentication, Authorization.
- It is based on .NET Core (ABP Framework ) with MS SQL Server as Backend.
- Implement entity state management, Custom Filters, Creating Stored Procedures, Session Management.

### **VideoStream — .NET Core API & Angular 14 & Sql Server      E-Commerce s/w — Aug'21 - Mar'22**

- It is E-Commerce website useful for various types Courses Buy and Sell.
- It has 2 Phases in 1st pahse we integrated more than 3 Third party API's like Youtube, Zoom, WhatsApp Integration, Razorpay integration.
- In 2nd phase we works on UBD it's a Marketer Interface that each marketer has their own interface with Username, Password.
- Authentication, Authorization, Complex data handling.
- It is based on .NET Core (ABP Framework ) with MS SQL Server as Backend and Angular 14 as Frontend.
- Multi-language support
- Implement entity state management, effects, and selectors for more complex state handling.
- Implement service workers for offline capabilities and improved performance
- Ensure the application is secured against XSS, CSRF, and other vulnerabilities by using security headers.
- Build reusable directives for encapsulating common behavior; Dynamic Routing

## Personal Projects

---

### Shopping and Entertainment — .NET Web Forms & Sql Server

E-Commerce s/w

- On the website particular user can be able to book any type of clothing wears, shirts, blazer's and many more.
- Admin can add many other products by their prices and users can easily login and access newly launched products.
- We also try to provide some entertaining section that must be included new movies and some entertainment
- In Entertainment section we try to provide users freely movies that they can watch anywhere they want by simply register on website.

### Amazon Clone — .NET Web API & Flutter & Sql Server

E-Commerce Android application

- It is Android app which build using .NET Web API and Flutter, with integrated Add to Cart and Get Widget for real time functionality.
- Also, separate admin and user panel with their login credentials, that is Admin can add products and user can view, Buy, Add to cart and Wish list the same.

### Lead Magnet — .NET Core Web API & React JS & Sql Server

ERP s/w

- Automated workflows to streamline sales processes. AI-driven insights for better decision-making..
- Effortlessly add leads, assign them to team members, and write instant feedback. Schedule meetings, manage tasks, and track follow-ups. One-click status changes keep your pipeline clear and your team focused. Close more deals with less effort.
- Our robust task management system empowers you to create, assign, and edit tasks with ease. Receive timely reminders and due date notifications to stay on top of deadlines. Effortlessly assign tasks to team members and attach relevant files for seamless collaboration. Maintain a clear history of all tasks linked to leads and clients, ensuring no detail gets lost.

## Personal Strengths

---

- Easy Adaptability, Self-Confidence.
- Quick Learner, Good Listner.
- Goal Oriented, Effective Time Management.

## Interests

---

- Cricket
- Badminton
- Chess

## Declaration

---

I hereby declare that the details furnished above by me are true to the best of my knowledge and belief.

Yours Sincerely,  
Siddhesh Chavan
