## PROFILE SUMMARY

Software Engineer with 2.5+ years of experience in web development, skilled in React.js, HTML5, CSS3, JavaScript, Bootstrap, Node.js, MongoDB, PHP and SQL. Proficient in building scalable applications, analyzing client requirements, and delivering tailored solutions while adhering to industry best practices.

## Work Experience

### Accenture

Dec 2022-Present

#### Custom Software Engineering Analyst

Front-end Developer

##### Responsibilities:

- Designed dynamic interfaces and used data insights to support educational strategies and improve user experience.
- Analyzed client requirements to design and implement tailored technical solutions, ensuring alignment with project objectives, industry best practices, and optimal functionality.
- Integrated RESTful APIs using Axios and Fetch, ensuring seamless data retrieval, manipulation, and synchronization for scalable applications.
- Managed dynamic data flows between frontend and backend systems, improving application responsiveness and reliability.
- Configured React Router for secure and dynamic routing, implementing nested navigation, role-based access controls, and session persistence to enhance user experience and application security.
- Leveraged React hooks such as useState and useEffect to streamline state management, improve component modularity, and boost application performance.
- Refactored and optimized existing codebases, improving readability, maintainability, and execution speed while adhering to coding standards and design patterns.
- Designed and implemented reusable UI components, including dynamic forms, buttons, and modals, to maintain design consistency and simplify future development.
- Conducted comprehensive testing using tools and methodologies such as unit testing and debugging techniques, ensuring smooth functionality, high-quality user experience, and adherence to client expectations. Enhanced user engagement and satisfaction by implementing intuitive and secure navigation features.
- Improved team productivity by developing modular, reusable components that decreased development time for new features.
- Received the Accenture ACE Award (2023) for outstanding performance and contribution to project success, and achieved recognition as a Merit Holder in the Accenture Tech Expressway Program for technical excellence.
- Successfully delivered large-scale mass activities with precision and efficiency, fostering excellent team collaboration that enhanced operational efficiency and ensured high client satisfaction.

### Arudhra Innovations

May 2022 - August 2022

#### Web Developer Intern

##### Responsibilities:

- Designed and implemented responsive and user-friendly interfaces using HTML5, CSS3, and frameworks like Bootstrap, ensuring compatibility across devices and screen sizes.
- Developed dynamic and interactive features using JavaScript and modern libraries, enhancing user engagement and functionality.
- Programmed robust back-end logic and managed database operations using PHP and SQL-based databases, ensuring efficient data handling, processing, and security.
- Collaborated with cross-functional teams to integrate front-end interfaces with back-end systems, maintaining smooth data flow and functional consistency.
- Successfully delivered end-to-end solutions within tight deadlines, ensuring high-quality outcomes aligned with business goals.

## Skills

- Front-end:** React.js, JavaScript (ES6), HTML5, CSS3, Bootstrap, jQuery
- Back-end:** Node.js, Express.js, PHP
- Database:** Mongo DB, SQL, NoSQL
- Tools:** Postman, Visual Studio Code

## Education

### Master of computer Application

CGPA 9.14

### Bachelor of Business Administration in Computer Application

70.87%

## Certification

- Building Blog using MERN Stack
- The complete ReactJS Course
- Master in Integrated Operation & Supply chain
