SUMMARY

I'm a recent graduate excited about starting my journey as an AWS Cloud Engineer. I have a solid grasp of AWS services and cloud computing basics, thanks to my coursework and personal projects. Comfortable with Linux and networking essentials. I've dabbled with EC2, S3, IAM, and VPC in AWS. Looking forward to applying my knowledge to real-world projects, learning new things, and growing in the cloud engineering field.

PROFILE SUMMARY

- Proficient in AWS services including EC2, S3, IAM, VPC, Route53, CloudWatch, CloudFront, SNS, RDS, and Lambda.
- Have good exposure on **Linux** operating system.
- Well-versed in networking and troubleshooting.
- Knowledge of **Windows server**.
- Configuration and setup of **Windows server and Windows OS**.
- Basic knowledge of **Hardware, PC assembly**.

HIGHLIGHTS

- Recent graduate eager to embark on a career as an AWS Cloud Engineer.
- Strong understanding of AWS services and foundational knowledge in cloud computing acquired through coursework and personal projects
- Proficient in Linux and networking fundamentals, essential skills for cloud engineering roles.
- Hands-on experience with key AWS services like EC2, S3, IAM, and VPC, gained through personal exploration.
- Enthusiastic about applying theoretical knowledge to real-world projects and committed to continuous learning and growth in the field of cloud engineering.

TECHNICAL SKILLS

- **Operating Systems:** Linux, Windows
- **Cloud Technologies:** AWS
- **Programming Languages:** C, C++, PHP
- **Database:** MySQL, Oracle.

EXPERIENCE

Software Developer | AB Software Solutions | Oct 2022 – April 2023 (Intern)

During my internship at AB Software Solutions, I developed and maintained web applications using PHP, and MySQL. I collaborated with front-end developers and project managers to integrate features and enhance application performance. My responsibilities included writing efficient PHP code, managing databases, debugging, and using Git for version control. I successfully implemented a new user authentication system and optimized the existing codebase, improving performance by 20%. This experience enhanced my technical skills and prepared me for a career in software development.

ROLES & RESPONSIBILITY

- **Development Assistance:** Collaborate on writing clean and efficient PHP code for web applications.
- **Testing and Debugging:** Conduct unit testing and debugging to ensure application quality.
- **Requirement Understanding:** Work closely with the team to grasp project needs and technical specifications.
- **Documentation:** Document code and processes for maintainability • **Learning:** Proactively learn new technologies and best practices.
- **Continuous Improvement:** Seek feedback and aim for personal growth.

EDUCATION

06/2023	Bachelor of Vocational: Software Development. (CGPA: 9.2) Yashwantrao Chavan Institute of Science - Satara, India
03/2019	Higher Secondary Certificate: Science Kisanveer Mahavidyalay Wai (Maharashtra State Board)
03/2017	Secondary School Certificate: General (First Class), Kanya shala Wai (Maharashtra State Board)

LANGUAGE PROFICIENCY

- English
- Marathi
- Hindi
