HARD SKILL

HTML, CSS, JAVASCRIPT,
ANGULAR, NODE JS, SQL, GIT
HUB, MONGO DB, MANUAL
TESTING, JIRA, AGILE, GIT,
POSTMAN, TYPESCRIPT,
CYPRESS

EDUCATION

BCA

Shiv Chhatrapati college Aurangabad,
Dr. Babasaheb Ambedkar Marathwada

MCA

Sinhgad institute pune,
Savitribai Phule Pune University

PROJECTS

worked on web based customer
management software (CRM) For
hotel management.

PROFILE

Highly skilled and motivated Front End (Angular) and Back End (Node.js) Developer with extensive experience in creating and implementing user-friendly and visually appealing websites and applications. Proficient in utilizing the latest technologies and frameworks to deliver cutting-edge solutions. Strong expertise in problem-solving, code optimization, and creating efficient and scalable software systems. Dedicated to driving project success through effective collaboration. Committed to staying up-to-date with industry trends and continuously improving skill sets to deliver high-quality results to clients and end-users.

PROFESSIONAL SUMMARY

- Developed and maintained web applications using HTML, CSS, and JavaScript, ensuring high-quality user interfaces and seamless user experiences
- Utilized Angular framework to build responsive and interactive frontend components, increasing overall application performance.
- Designed and optimized SQL database queries, enhancing the application's data retrieval efficiency.
- Integrated Node.js backend solutions, creating scalable and robust server-side functionalities.
- Leveraged Git for version control, collaborating effectively with team members and ensuring smooth code integration
- Utilized Postman for API testing and validation, ensuring reliable and consistent communication between frontend and backend components.
- Implemented MongoDB to handle and store large datasets efficiently, enhancing data processing capabilities.
- Translated application logic and design into TypeScript, improving code maintainability and reducing potential errors
- Contributed to projects hosted on GitHub, actively participating in code reviews and continuous integration processes.
- Utilized Jira to manage project tasks, ensuring timely delivery and efficient issue tracking within an Agile development environment.
