Software Test Engineer

Objective:

Detail-oriented, enthusiast, motivated individual with over 4 years of experience in IT, intend to build a career in challenging environment with commitment and dedication which will allow me to explore self and help grow the organization.

Professional Summary

- Over 4 years of experience in Information Technology with specializing in **Manual Testing, Database Testing, Automation Testing and Web based application.**
- Extensive working experience on all the phases of **Software Development Life Cycle [SDLC], Software Testing Life Cycle [STLC],** its methodologies such as **Agile, Scrum and waterfall model.**
- Expertise in **analyzing business, functional and technical specification.**
- Experience in writing **test plan, test cases, and test procedure and test scripts from requirement and use cases.**
- Good knowledge about the **scrum agile model.**
- Experience in **automation testing using the java platform**.
- Proficient in using the test automation tool such as **Selenium Web Driver, Test NG** to develop the automation testing scripts for web based application.
- Good experience in **data driven and hybrid testing framework.**
- Experience in functional testing regression testing and system testing using **manual and automated testing tools –selenium web driver.**
- Experience in automating test cases using **selenium webdriver, testing, JUNIT and cucumber.**
- Experience in BDD framework using Cucumber.
- Experience in Design the framework from crash with the help of **Page Object Model (POM) design Pattern.**
- Experience of different types framework as like **Data Driven Framework, Hybrid framework and BDD framework.**
- Worked on cross browser testing browsers like **Mozilla fire box, Google chrome and IE using web driver**.
- Expertise in performing different type of testing: **Sanity Testing, Black Box Testing, Smoke Testing, Functionality Testing, Integration Testing, Retesting, Regression Testing, user acceptance testing And Full Life Cycle Testing**.
- Good working knowledge in **UNIX, SQL and WINDOWS platform.**
- Experience in automation technologies **like selenium IDE/WEB driver /grid, maven, Junit, testNG, cucumber.**
- Ability to work in a fast paced, dead line driven environment .
- Excellent inter personal and customer relation skill.
- Experience working in domains like BSS /OSS Telecom domain.

- Experience in **oracle and SQL server.**
- Good Experience with **API testing using postman tool**
- Proven communication, presentation skill and leadership qualities
- Sound technical knowledge ,excellent expose and ability to learn any tool quickly

TECHNICAL SKILLS:

Testing Tools	Selenium IDE/ WebDriver/GRID, TestNG, Cucumber,
Languages	JAVA, HTML, XML, PL/SQL
Web Technologies	HTML, XML
Scripting	JavaScript
IDE	Eclipse
Test Framework	Junit, TestNG, Data Driven Framework
Web Debugging Tool	XPath, Firepath, Firebug
Build Tool	Maven
Processes	Agile-Scrum, Waterfall
Bug Tracking Tools	JIRA, Quality Center (QC)
Version Control	GIT
Data Bases	MS Access, Oracle
Operating Systems	Windows (XP, Vista & 7, 8)

PROFESSIONAL EXPERIENCE

- Currently working as a Software Test Engineer with **Doms IT Solutions Pune** since Jan 2020 till date.
- Worked as a Lecturer in BCA college SNDT University from June 2010 to Apr 2018.

EDUCATION QUALIFICATION

- Completed Bachelor of Engineering in 2007 from SRTMU Nanded University.

PROJECTS UNDERTAKEN

Project Name	Billing Management System
Domain	Telecom Domain
Client	BT Group, USA
Testing Tools	JIRA, SQL Server, Selenium , Test NG
Application Environment	Html, JavaScript, CSS, Java/j2ee (JDBC ,Servlets ,JSP),and Oracle

Project Description:

Roaming can be either national roaming or international roaming. National roaming means that mobile subscribers make use of another network in geographical areas, where their own operator does not have coverage. This is, e.g., used by operators, who do not have complete coverage in a country. Roaming is the ability for a customer of mobile communications to automatically make and receive telephone calls, send and receive data, or access other services while travelling outside the geographical coverage area of the home network, by means of using a network of another operator. International roaming is used when mobile subscribers travel abroad and make use of the network of an operator in the foreign country.

CDRs generated in one roaming partner's area are collected and rated by that roaming partner and finally they are sent to the actual service provider of the roaming customer. Actual service provider charges the end customer for all the roaming services provided based on their predefined service charges.

Responsibilities

- Analyze the Business Requirements and closely work with the Business Team to get the clarifications addressed
- Run Defect Trailing and Review the **Test Scenarios/ Test Cases with Business**
- Designed, executed and maintained **Selenium Web Driver (TestNg, JUnit) automated test cases for regression test cases**
- Selected the Test Cases to be **automated and performed functional testing** of the front end using Selenium (IDE and Web Driver)& created **Data Driven framework using TestNG.**
- Executed parallel browser testing performed **cross browser testing.**
- Execute the Test cases and review the results to get the Business approval for UAT
- Experience in **Web Services testing using Rest.**
- Functional Testing tool Selenium and the **various frameworks in Selenium.**
- Wrote highly efficient and **maintainable Java code to develop Page Objects** using the Selenium Framework.
- Created automated functional regression test scripts using Selenium and scheduled, organized and executed the test scripts in Selenium integrate environment and documented the test results.
- Performed Data driven testing using **Selenium WebDriver and Test-NG** functions which reads data from property and **XML** files.
- Used **Maven** to build and run the **Selenium** automation framework. Once the script got over, framework used to send the automation reports over email.
- Developed **Maven** Build scripts to run Sanity Test scripts developed in **Selenium WebDriver.**
- Created automation framework in **Selenium WebDriver** using behavior driven approach like **Cucumber**.
- Co-ordination between Technology and Business to ensure all the outstanding issues are being addressed, fixed and retested.
- Performed **Database Testing and basic knowledge in SQL/PL SQL.**
- Planning for Test Execution activities to accomplish tasks on **daily/weekly basis**
- Performed **browser compatibility testing**

- Performing Regression test using automated testing tool **Selenium, Test NG** and Cucumber
- Involved in the regression test planning for the project and identified the critical regression tests
- Executed the automated regression test cases during every release and also executed the daily regression test suites
- Expert knowledge on daily status reporting and managed end to end testing from **Test management tools like Quality Center.**
- Performed data accuracy, data validation and data integrity testing by querying the **database using SQL queries** to check the data table on server.
- Conducted **backend testing using SQL queries** to validate data for database.
- Participated in Stand-up meeting, walkthrough meeting, weekly automation meeting with all other QA, weekly assessment meetings with business analysts and developers

PERSONAL DETAILS:

Name	Pramod Vishwanath Kamble
DateofBirth	21/04/1986
Nationality	Indian
Languageknown	English, Marathi,Hindi
CurrentAddress	Pathare vasti Lohgaon Pune
