Board Of Secondary Education Andhra Pradesh (SSC)

CGPA: 10.0

Internships

SkillVertex

Remote

Student Intern

October 2022- November 2023

- This internship is based on Web development

Happieloop

Remote

Student Intern

September 2023 - October 2023

- This internship is based on Full Stack Development

Coapps

Remote

Intern

February 2024- April 2024

- This internship is based on Data Science

Projects

Travel Vista: Tailored Travel Destinations Discovery

- Project is developed using concepts of web development and python
- In this project , we are suggesting places to users based on their requirements.

Online Voting System

- In this project I have created javascript application using concepts of javascript and embedded javascript for elector to be able to create voting system.
- Features included are:
 - An admin should be able to sign up
 - Admins can create elections

- Admins can create a ballot of questions in an election
- Admins can register voters
- Admins can launch an election

TODO Manager

- In this project I have created a todo manager application using the concepts of JavaScript and Embedded JavaScript.
- Here users can have there own personal accounts where the can post there tasks in there personal portals..

Employee Salary Prediction using Machine learning

- In this project, based on the previous data we had created a machine learning model which will predict future employee salary by analyzing present data.

Grocery Support

- A project based on web technologies(PHP), DBMS. In this project, we are creating an interface between a grocery store and a customer

Smart irrigation using solar panel

- A project based on the Internet of Things. In this project, we have created an irrigation system where the soil is irrigated when the moisture level is less than the required value.

Air and Sound pollution monitoring system

- A project that is also based on Internet of things. In this project we have combined both the air pollution monitoring system and the sound pollution monitoring system which shows the high pollution in sound or air.

Ambient temperature sensor

- A project based on the Internet of Things. In this project, we have manufactured a sensor that senses the temperature in the surroundings and displays it on the LCD Screen.

Technical Skills, Soft Skills and Interests

Programming Languages: Python, HTML/CSS, JavaScript, SQL, DBMS Full Stack Web Development, Machine Learning, OOPS, Data Science

Soft Skills: Oration, Empathy, Curiosity, Teamwork, Leadership

Areas of Interest: Creative Arts, Volunteerism

Personal Details

Gender : Male

Date of Birth : 02 June, 2002

Address : 11-10-695, Bhurhanpuram, Khammam, 507001

Declaration

I hereby certify that the above given data is true and correct to the best of my knowledge and belief.

Place: Hyderabad

Date:
