Dr. Vasantdada Patil Madyamik Vidyaniketan

04/2015 - 04/2016

Percentage - 81.20

PERSONAL PROJECTS

2)EC2TaskMaster

- I launched a Node.js app on AWS EC2. I was in charge of designing the app structure, setting up AWS EC2, and ensuring it works well all the time. The app is now running smoothly, providing a better experience for a lot of users. I learned how to solve problems and make Node.js apps work better on AWS. This project shows I know how to use cloud computing effectively.

- Tools : AWS(EC2, IMA), Putty, github

3) SMS Web Application (01/2024)

- This application is designed using Angular, aim to design this application is to provide bulk sms sending service to user. So that user can use this application to send bulk sms to their customers or client.
- Frontend : Angular
- Backend : Node.js
