### PROJECTS

#### CS Car Booking Application :

CS Car Booking Application is a convenient mobile app for Android and iOS users to book cars for round trips and multiple trips. Super Admin can book cars for users and assign drivers to them. Registered drivers are eligible to accept rides from the app. The app offers a simple, one-page layout with full mobile compatibility.

#### CSPL(Client) Attendance

CSPL(Client) Attendance is a comprehensive application for tracking employee attendance. Employees can easily punch in and out with the help of a face scanner, ensuring accuracy and reliability. Super admins have full control over the system, allowing them to add or deactivate employees and view detailed attendance calendars. In cases where the face scanner is unable to detect an employee's face, manual punching In or Out is available with approval from the super admin.

#### B2B(Branch to Branch) Catalouge Application

B2B Catalouge Application is a mobile application designed to facilitate communication and work between branches. It provides users with the ability to purchase products, with detailed information about each product organised into different categories. Sales personnel can use the app with their respective employee IDs and customers' mobile numbers. Customers receive notifications of their orders on their mobile devices.
